Hi Diana,

I sent the Expedited Settlement Agreement on 11/10/22. You have 30 days to sign it, which means you accept the offer. Once you accept it, you have another 30 days to return to compliance. You can get additional time if you need it, but you still need to accept the ESA offer by or on 12/10/22. Thanks.

Darla

Hey Darla,

I have attached some photos of the work we have completed with the additional containment and unloading zone.

I have reached out to Cody his company was the company to do the inspection on Wednesday. He stated the report will take time to get together but did mention there will need to be things that need changed. Painting the tanks is on the list of items but will be a spring project since it is now to cold. As soon as I have the report I will forward that on to you but am unsure of when I will have that.

Blaine is currently working on the adjustments needed to the SPCC Plan that we needed to make. When I spoke to him on Monday he said he would have it done by Wednesday but when I reached out yesterday he stated he still hadn't completed that either.

Sadly I am not able to provide the information you need until I am able to get it back from the contractors. I will keep you update as I get info.

Thank you,
Diana
